Concepts

Object-Oriented- Programming

I am well experienced in Object-Oriented-Programming through courses that I have taken in Highschool and University. I am knowledgable in topics such as; Abstract classes, Exception Handling , User Interface, Polymorphism, GUI, Hashing.

Data Structures

I am educated on different data structures and how to program them or handle them. Data Strucutres such as; Binary trees, Queues, Lists, sets, Arrays, and all linked data structures.

Languages/Skills

Python	**Java**
C	**Javascript**
Css	**Armv7**
HTML	**React**

Languages (Human)

English

I learned English at the age of 7 and I can confidently say that I am able to speak, write, read and communicate in english at an advanced or fluent level

Arabic

Arabic is my first language so i am naturally fluent at it. However, I am not necessarily fluent when it comes to writing in arabic, I would consider myself as an "advanced" writer in arabic
